DANIEL AYEKU

FRONTEND DEVELOPER

Lagos, Nigeria | +234 915 294 5170 | ayekudaniel@gmail.com | Portfolio | GitHub | LinkedIn

PROFILE

Frontend Developer with **2+ years of experience** building web applications with React, Next.js, TypeScript, JavaScript, and CSS. Build interfaces that connect cleanly to real backend services, authentication systems, databases, and APIs. Currently a **Co-Founder & Frontend Developer at KampusPlug**, working with UI/UX designers and backend developers to build and ship a student marketplace used by real vendors and buyers.

EXPERIENCE

KampusPlug — Co-Founder & Frontend Developer

December 2025 – Present

- Co-founded and helped build a student marketplace with **10 verified vendors, 40+ products, and completed transactions** on the platform.
- Work closely with UI/UX designers and backend developers to turn product requirements and designs into responsive, working features.
- Built marketplace interfaces covering product discovery, search and filtering, vendor dashboards, cart and checkout, orders, wallet, messaging, and related user flows.
- Built the **KampusPlug Admin Dashboard** for managing key platform operations and administrative workflows.
- Connected frontend features to backend APIs and real-time services and used React Query to manage server-side and client-side data.
- Contributed reusable TypeScript components and feature modules across the main marketplace and admin dashboard.
- Worked through real product testing, user feedback, marketplace flows, and completed orders while continuing to improve the platform.

SELECTED PROJECTS

Alumni Connect — Final Year Project

March 2026 – August 2026 | Live Project

Next.js • TypeScript • Supabase • PostgreSQL • Tailwind CSS • Vercel

- Built and deployed a full-stack alumni networking platform connecting students and alumni around mentorship, career opportunities, and networking.
- Implemented authentication, protected routes, role-based dashboards, dynamic profiles, and student/alumni-specific experiences.
- Built mentorship discovery and request workflows, job posting and application flows, and database-backed activity feeds.
- Designed and managed the application's data layer with Supabase and PostgreSQL, including Row Level Security policies and access control.
- Debugged authentication and database access issues involving `auth.uid()` and profile records and refined the application based on testing with classmates, friends, and lecturers.

SIWES Tracker

React • JavaScript • CSS • Tailwind CSS • React Router | Live Project

- Built a responsive web application for tracking SIWES progress and coordinating activities within a student group.
- Implemented dashboard, group log, navigation, and activity views with reusable React components.
- Added dark mode and responsive layouts for different screen sizes.
- Used React Router to structure application navigation and localStorage for client-side data persistence during development.
- Tested the application with a small group of users and refined the interface based on their usage and feedback.

NASA APOD Viewer

React • JavaScript • CSS • REST API | Live Project

- Built a React application while learning how to work with external APIs using NASA's Astronomy Picture of the Day API.
- Implemented API requests, dynamic rendering, loading states, and error handling.
- Displayed the daily astronomy image and description in a responsive interface.
- Structured the UI into reusable React components and handled API-driven content without hardcoded daily data.
- Used the project to strengthen practical understanding of asynchronous JavaScript, API responses, and frontend state handling.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, React Router, Responsive Design

Data & Integration: Supabase, PostgreSQL, REST APIs, React Query, Real-Time Data, Authentication, Row Level Security

Tools: Git, GitHub, Vercel, Vite

EDUCATION

B.Sc. Computer Science — Olusegun Agagu University of Science and Technology (OAUSTECH), Nigeria | **2026**
